

ORCHIDOPHILIA 2019

BEGINNER WORKSHOPS

We will be offering a series of workshops as the Show, two on Saturday afternoon, two on Sunday morning and two on Sunday afternoon. These workshops are aimed at beginners, but anyone is welcome to attend. We have limited seating available so please show up in good time – first come, first served! Each workshop will last about 45 to 50 minutes, possibly a bit longer if there are a lot of questions.

We will have two different workshop topics, both focused on the so-called “moth orchids” (Phalaenopsis) which are very popular especially with beginners.

Phalaenopsis are perennials which can live for many years if they are well treated. The **first workshop** will discuss how best to look after your orchid plant so that it will not only stay alive but will thrive and hopefully continue to bloom year after year. Eventually your plant will need to be re-potted and the **second workshop** will give you an insight into the best way to do this. Attend both workshops and you can be confident your plants will repay your efforts many times over.

Workshop Schedule

* **Note** – times may change, and any updates will be posted at the show.

WORKSHOP	SATURDAY*		SUNDAY*			
	2PM	3PM	10 AM	11AM	2PM	3PM
